FIRE DISTRICTS.

The city is divided into Ten Fire Districts, as follows : —

DISTRICT 1. — Comprises all that part of Boston known as East Boston.

DISTRICT 2. — All that part of Boston formerly known as Charlestown.

- DISTRICT 3. — All that part east of a line beginning at the Charles-river drawbridge, and running through the centre of Charlestown street, Haymarket square, and Washington to Summer street, and north of Summer street and the N.Y. and N.E. R.R. passenger depot to the water.
- DISTRICT 4. — All that part west of District 3, and north of a line running through the centre of Winter and Park streets, and west of Beacon, to Arlington street, west side of Commonwealth avenue, to Chester park, to water.
- DISTRICT 5. — All that part south of Districts 3 and 4 to the centre of Dover-street drawbridge, and a line running through the centre of Dover, Berkeley, Boylston, east side of Commonwealth avenue, to Arlington, to Boylston street.
- DISTRICT 6. — All that part of Boston known as South Boston.
- DISTRICT 7. — All that part of Boston south of District 5, to the centre of Albany street, thence through the centre of Albany, Northampton street, Columbus avenue, and Chester park, to east side of Commonwealth avenue, to centre of Berkeley, to Dover street.
- DISTRICT 8. — All that part south and west of District 7, to the boundary line of West Roxbury, and west of Washington street to the Brookline boundary line, and including all of Ward 25, formerly Brighton.
- DISTRICT 9. — All that part south of Districts 6 and 7, to West Roxbury line, running through the centre of Blue Hill avenue, Columbia, Green, Bowdoin, Church, and Commercial streets, to Dorchester avenue, thence due east to the water.
- DISTRICT 10. — All the southerly part of Boston south of Districts 8 and 9, including West Roxbury.

ASSIGNMENT OF DISTRICTS.

Each district is placed under the charge of an Assistant Engineer, as follows : —

HOUSES.

Extensive repairs, during the year, have been made on the houses of the Department, and the improved style of stalls has been introduced in most of them. All the inside work of painting, carpentering, and plumbing is done by a detail of members of the permanent force, and thus a great saving in the expense of the work is made to the city. The following statement shows the repairs and improvements made during the past year : —

CITY PROPER. *

Hook and Ladder No. 3. — New style of stable doors, painted and grained.

Hose 8. — New stable floor and stalls; house whitened and painted.

Aerial Ladder House. — Whitened, painted, and front doors grained.

Chemical House No. 2. — Whitened, painted, and sliding-pole introduced.

Engine 7. — New stalls, new style of doors, rooms painted, and stall doors grained. Extra sliding-pole introduced.

Engine 22. — New style of stall doors, rooms altered and painted. Sliding-pole introduced.

Engine 26. — Iron columns removed, new truss put in. Stall doors altered to new style, house painted and whitened throughout, front doors grained. Extra sliding-pole from smoking-room put in.

Hook and Ladder 1, Engines 4, 6, 10. — New style doors, painted and grained in all the houses.

Water Tower. — House whitened and painted, new style stall doors, outside doors painted and grained.

SOUTH BOSTON.

Hose 12. — Stall turned to face the apparatus, house whitened, painted, and grained. Sliding-pole introduced.

Engine 1, 15, Hose 9, 10, and Hook and Ladder 5. Houses whitened throughout.

EAST BOSTON.

Engine 5. — Sliding-pole from chamber to the lowest floor.

ROXBURY DISTRICT.

Engine 12. — Smoking-room enlarged, rooms whitened and painted, front doors grained. Sliding-pole introduced.

Hospital. — New stalls and stable floor. Stable painted.

Engine 24. — Sliding-pole put in and new shed for coal and coal wagon built.

DORCHESTER DISTRICT.

Hook and Ladder 6. — Hard-pine floor in apparatus rooms, stalls turned to face the front, stable and house ventilated.

Engine 16. — New stalls, stable, and engine-room painted and put in good order.

Engine 20. — Stalls turned to face the apparatus. Sliding pole introduced, and other small repairs made.

Engine 19. — Stalls turned to face the apparatus. Sliding pole put in; house painted throughout, inside and outside; front doors grained, and roof put in perfect order.

CHARLESTOWN DISTRICT.

Engine 27. — New stalls, and plumbing put in good order.

JAMAICA PLAIN.

Engine 28. — Six stalls turned to face the apparatus; unfinished room put in perfect order for smoking-room; house painted throughout; heating-apparatus put in perfect order. Sliding pole introduced.

WEST ROXBURY.

Chemical 4. — Stall turned to face to the front; engine-room painted.

During the year arrangements were made with the proprietors of India wharf for a berth for the fire-boat "Flanders," at the end of the wharf; and for the accommodation of the officers of the boat a new house has been built. The new location is a great improvement on the old. The old location was in the vicinity of an outlet of one of the main sewers. The chances of a blockade are less now, in getting in and out of the dock, and the boat can reach fires on the water-front more expeditiously. Land for an engine-house has been purchased in the Charlestown District, and plans for a house with modern improvements are being made by the City Architect. The Board again urges the necessity for building a house for an engine and ladder company, to better protect that now thickly settled locality known as the Back Bay. A lot on the corner of Boylston and Hereford streets has already been purchased by the city for that purpose. The dwelling-houses in that locality contain valuable personal property, and in the opinion of the Board, need better protection against fire.

The following property is in charge of the Board of Commissioners of the Fire Department:—

APPARATUS REPAIR-SHOP.

The following statement shows some of the important repairs done at the shop during the past year from May 1, 1882, to April 30, 1883 : —

May. — Engine 26, general repairs. Engine 12, general repairs and painting. Fire-alarm Telegraph, new magnets.

June. — Engine 17, general overhauling. Chemical Engine 5, repairs of acid jars, etc. Engine 5, and Chemical Engine 2, general overhauling. Engine 7, new boiler, etc. Engine 25, repairs and painting. H. & L. 1, new wheels, etc.

July. — Engine 10, general repairs, repairs on Engineer Colligan's wagon. H. & L. 9, and Chemical 1, repairs on wheels. Engine 7, new tubes and repairs. Repairs on buggy of Superintendent of Fire Alarm.

August. — Engine 6, repairing boiler and valves. Aerial Ladder, repairs and painting. Repairs on Supply Wagon. Fire-boat, general repairs and painting.

September. — General repairs on H. & L. 4, Hose Carriage 3, Engine 11, and Relief Chemical Engine A. Engines 14 and 24, hose pump repairs. Repairs on wagon assigned to the Chief Engineer. Making of 12 hose pipes ; also, Fire-alarm Telegraph brackets.

October. — Repairs on hose pumps of Engine Cos. 17 and 21. Making 500 battery zines ; two new wheels for Engine 22 ; Hose 2, repairs on reel and painting. House fittings for Engine 28. Bell machine at Everett School-house.

November. — Engine 3, new boiler, etc. Repairs on Fire-Alarm wagon. Repairs on dome of Engine 10. Repairs of wheels of Engines 4 and 14.

December. — Repairs on Relief apparatus, and on pumps of Engine 15. Hose 10, general repairs and painting. Water tower on axles and gauges.

January. — Making 3 stoves. Chemical Engine 2, general repairs.

February. — Repairs on pumps, etc., of Engine 2, and new hind axles for Engine 20.

March. — Repairs on Relief Chemical Engine A, and general repairs on Engines 21, 22, and 27.

April. — Engine 10, new link blocks, painting, etc.

During the year the following new apparatus has been purchased : —

One second-class Amoskeag Engine ; 4 coal wagons ; 2 engineers' wagons ; hose wagons ; one Hayes Extension Ladder Truck and Fire-escape.

This latter piece of apparatus carries ladders of the following dimensions, viz.: one Hayes Patent Extension Ladder, which can be raised 85 feet from the ground, the main ladder being 41 feet long, and the extension 42 feet long, and worked on a turn table; one each 30 and 28 feet arranged for splicing, making a ladder 48 feet long; one each 25 feet, 22 feet, 18 feet, 16 feet, and one roof ladder 12 feet, with the usual equipment of rope, etc. It is the intention of the Board to place it in active service, and in charge of three permanent men, as soon as the repairs on the house selected for it are completed. Its advantage over other ladders is the ease and quickness with which it can be raised and manipulated, an important point, especially in the saving of human life, and the raising of hose to the upper stories of buildings at fires. Hook and Ladder Companies 1, 3, and 8 have also been supplied during the year with a complete set of *Pompier* ladders of the St. Louis pattern. A new engine company will soon be located in the house now occupied by Chemical Engine No. 7, West Roxbury, to better protect that section of the city.

No steps for the building of a new repair-shop for the department have been taken, although plans for the same have been made by the City Architect and a lot of land set apart for it on Albany street. The Board hopes that an appropriation will soon be made to meet this growing need of the department.

The cost of maintaining the repair-shop during the year was	\$11,071 14
Less old material exchanged for new	472 37
Total	<u>\$10,598 77</u>

Distributed as follows:—

Repair of apparatus	\$7,195 40
Fire-alarm telegraph, and bell and clocks	1,313 68
Engine-houses, hose and harness shop	1,300 44
Tools, and small supplies, hydrants and reservoirs	789 25
Total	<u>\$10,598 77</u>

HOSE AND HARNESS.

The cost of repairing hose in the department during the past year has been	\$737 67
Making and repairing harness and fire-hats	2,065 86
Total	<u>\$2,803 53</u>

The patent swinging harness, which saves time in hitching, and the wear and tear of harnesses, and in addition is a great relief to our horses, is now in general use throughout the department, every house being supplied with it.

During the year 12,600 feet of hose were purchased, and 9,650 feet condemned. The amount of hose now in use is as follows : —

Rubber	15,163
Cotton	38,301
Leather	11,500
Chemical	2,067
Hand	2,052
Suction	937
								<hr/>
Total	70,020 feet

HORSES.

The number of horses in the department is 151. During the year 2 horses have died, 11 have been exchanged, and 16 have been purchased.

WATER AND HYDRANTS.

The total number of hydrants in the city May 1 was 4,530. In addition to these hydrants there are 238 fire reservoirs in different sections of the city that contain from 300 to 500 hogsheads of water, and can be used in an emergency. The number of hydrants added during the year is as follows : —

40 Lowry, 37 Post, 28 Boston, and 22 Boston Lowry. The amount paid by this department for water and the care and maintenance of hydrants was \$88,800, or at the rate of \$20 per hydrant. In the opinion of this Board the amount charged for water and hydrants should be placed in the appropriation of the *Water Department*, instead of the Fire Department.

FIRE-ALARM DEPARTMENT.

The following is a synopsis of the new construction and repair-work of this department for the year ending April 30 : —

Circuits 1 and 11, in South Boston, have been entirely rebuilt, the wires being placed on substantial structures, located with the view of avoiding interference from other wires so far as possible. The inside work in the department houses has also been entirely renewed.

Three new telephone circuits have been built, bringing several additional houses into connection with head-quarters, which nearly completes the construction of the telephone service in this department.

Wire has been run for the purpose of placing the bells in the city proper on independent circuits. This work is not at present completed, but it is intended to finish it during the present season, thereby rendering an alarm on the house-gongs more certain. Thirteen new signal-boxes have been placed in service, making a total of 320 boxes connected with the central office. Work is now in progress for constructing 36 additional Tooker keyless fire-alarm box-doors, to be placed in the Burnt District and the Back Bay. Six of these patent keyless doors have already been in service for two years as an experiment, and have given satisfaction. It is the intention of the Board to place them, from time to time, in localities where needed, as they save much valuable time in giving an alarm after the discovery of a fire, and do away with the necessity for hunting up a key, as by them any citizen who discovers a fire can at once repair to the nearest box and give the alarm.

The amount of stock required and used in the Fire-Alarm Department during the past year was as follows : —

Iron wire, 60 miles,
Cotton insulated wire, 250 pounds.
Kerite wire, 3,000 feet.
Glass insulators, 3,000 feet.
Lag screws, 3,000 pounds.
Lumber, 7,000 feet.

Extensive alterations and improvements have been made in the Central Office, the entire walls having been sheathed with maple and cherry, and new carpets laid, by which the operating room has been made a model of comfort and neatness, the work being done by members of the Fire Department.

The new glass case for the striking-machine, referred to in last year's report, was put in last summer, and the new switch-board, which is a fine sample of mechanical workmanship, — the frame of which was constructed by Assistant Engineer Abbott and Assistant Engineman Heyman, — was placed in position and connected for service in November.

Contracts are now being made for an additional 18-pen register, and a duplicate of the relays and indicator now in use in the office, with a view to a further increase of the fire-

alarm circuits, a greater certainty in the reception of alarms from the boxes, and the better protection of the city. These, when completed, will make the fire-alarm machinery in the Central Office sufficient to meet the wants of the city for many years to come.

A new set of fine galvanometers, twenty-five in number, has been placed in a convenient position for present and future use.

In the month of November last experiments were begun with the Serson and Kauffer battery, and continued through the succeeding four months with such successful results that it has been adopted for use in the department. Two hundred and fifty cells of this patent have been purchased, and circuits 2, 3, 4, and 5 are now working with them, and it is the intention of the Board to gradually introduce them into all the circuits before the end of the year.

FIRES.

The number of alarms for fires, during the past year, was 727, being the largest, with one exception, for any year since the establishment of the city.

The loss by fire from May 1, 1882, to April 30, 1883, with the insurance, was as follows : —

	Loss.	Insurance.
On buildings . . .	\$194,862	\$3,592,067
On contents . . .	619,292	3,707,286
Total . . .	\$814,154	\$7,299,353

The average loss per fire-alarm during the year was \$1,100. The number of fires during the year, whose loss exceeded \$20,000 each, was seven, viz. : —

June 8, 1882.	Marginal, Webster, Everett, and Jeffries streets	\$20,000
12, " "	Wareham "	65,000
Aug. 15, " "	Haymarket place	20,000
Dec. 19, " "	Love's Gun Store, Cornhill and Washington street	111,000
Dec. 31, " "	Pearl street and Atlantic avenue	68,000
Mar. 19, 1883.	Washington Building, Washington street	45,000
Apl. 6, " "	Hotel Berkeley	61,000

There were six lives lost by fire during the year, two of them being the result of a careless use of kerosene oil. The loss of life through a fire-panic, in one of the public schools of New York, a short time ago, and the more recent holocaust of over two hundred children at an entertainment at Sunderland, England, are reminders of the necessity for providing other means of exit in case of panic in our public schools than the inside stairways. Many of our school-buildings are four or five stories high, and have no other means of exit in case of fire or smoke than the inside stairways. This Board is of opinion that there should at least be as ample protection for children in the public schools of this city, in case of fire, as there is for grown persons in the cotton and woollen factories of the State, and would recommend the placing of suitable external fire-escapes in all the public schools of the city.

Each ladder truck in the department has been supplied with a medicine-chest containing all the necessary appliances needed in case of accidents at fires.

POLICE.

The Board begs to commend the promptness and efficiency of the Police Department at fires during the year, and the good order preserved by them on these occasions renders the duties of this department far easier than they otherwise would be.

PROTECTIVE DEPARTMENT.

To this department is due much credit for lessening the fire loss each year, and the harmony which exists between this branch of the fire service and the members of the Fire Department at fires is worthy of all praise.

THE FIREMEN'S RELIEF FUND.

The Mayor and Board of Fire Commissioners, trustees of the Boston Firemen's Relief Fund, have the sum of \$32,000 invested in bonds of the City of Boston. During the year ending Dec. 31, 1882, the sum of \$5,277.35 has been distributed among our sick firemen. The greater part of the money in trust comes from the Annual Ball of the department, which netted this year the sum of \$12,142.43. Several citizens have also sent generous donations to this fund.
