

FINEST IN DEPARTMENT.

Fire Station at Warren Av and Clarendon St
Will Soon Be Completed.

NEW FIRE STATION 22, WARREN AV AND CLARENDON ST.

On the eastern side of Warren av, just south of Clarendon st, the now, double apparatus station for the Boston fire department is receiving its finishing touches.

This station was erected at an approximate cost of \$30,000, and when ready for occupancy it can properly be called the best-fitted house in the entire fire department.

It has an exterior of fine faced brick, with heavy granite pillars and trimmings, while the interior will be finished on three floors in whitewood, and the department on the first floor, to be occupied by the apparatus, in ornamental sheathings and glazed brick.

Upon the ground floor will be the apparatus, with four stalls in the rear. The second floor will be devoted to lavatories, bathrooms, toilets and lockers' officers' rooms and a large storage room. The third floor will be set aside for a gymnasium, a billiard and smoking room and officers' quarters.

Upon the roof a garden will be let, where in the hot months officers and men may seek the cooling breezes.

This new station will be known as "22," and the company and apparatus now at "headquarters," but formerly stationed on Dar-mouth st, before the N Y, N H & H RR widening, their system destroyed the old station, will be housed there with an additional company, to be chosen in the future.
